Subject: Discuss Federal Reuse Action Plan and CA Support Needs?

Greetings- Following up on our recent State Board-EPA meeting, I am writing to suggest setting up a call or meeting to discuss the federal Water Reuse Action Plan and how it might intersect with efforts in CA to support and promote water reuse, stormwater capture, and water use efficiency. I discussed the plan with Darrin P, but would like to spend some time exploring other perspectives and gaining additional advice about where the federal plan should and should not focus. The plan is intended to align federal agency efforts to promote wise use of water resources, and recycling and capture in particular. We are aware of the many successful efforts to advance water recycling, capture, and efficiency in CA, but we are also hearing that more can be done to facilitate our water recycling goals. We expect the plan will address, at a minimum, actions in the following categories

- Funding/Financial Assistance
- Regulatory Certainty and Integration of CWA and SDWA requirements
- Technology Propagation and Validation
- Science Research
- Building Support for Reuse and Capture Through Improved Outreach and Communication
- Institutional Issues Affecting Capacity to Pursue Reuse

Might we set up a call or meeting in the next 2-3 weeks? I would be happy to come to Sac for a meeting, and would also be open to involving others you think should be involved. Please let me know, and thanks.
